**DESCRIPTION**

This course will review various ways in which technology can be used in language learning, teaching and research. We will be working with technologies such as synchronous and asynchronous online communication, audioconferencing, podcasts, blogging, Ning and wikis as tools for language learning and the development of intercultural awareness and understanding. Students will also learn to create web sites and activities. These hands-on skills will be balanced with readings that provide a theoretical foundation in the use of technology in language education and second language acquisition.

**Prerequisites**

Students who have not registered with the Disability Resource Centre are not eligible for formal academic accommodation. You are also required to discuss your needs with your instructor no later than fourteen (14) days after the start of this course.

**PLAGIARISM**

Plagiarism is a serious offence, the penalty for which is an F on the assignment and possibly also an F in the course, academic probation, or requirement to withdraw. The University Calendar states that "plagiarism exists when:

- the work submitted or presented was done, in whole or in part, by an individual other than the one submitting or presenting the work (this includes having another impersonate the student or otherwise substituting the work of another for one's own in an examination or test);
- parts of the work are taken from another source without reference to the original author;
- the whole work (e.g., an essay) is copied from another source, and/or
- a student submits or presents work in one course which has also been submitted in another course (although it may be completely original with that student) without the knowledge of or prior agreement of the instructor involved.

While it is recognized that scholarly work often involves reference to the ideas, data and conclusions of other scholars, intellectual honesty requires that such references be explicitly and clearly noted."

Plagiarism occurs not only when direct quotations are taken from a source without specific acknowledgement but also when original ideas or data from the source are not acknowledged. A bibliography is insufficient to establish which portions of the student's work are taken from external sources; footnotes or other recognized forms of citation must be used for this purpose.
